

PHASE 1 – Brainstorming & Ideation

1. Project Title

PocketSmart AI: Your Smart Budget & Recommendation Assistant

2. Problem Identification

- Managing budgets for home interiors, party planning and jewelry shopping can be difficult because users have many products, platforms and price ranges to compare.

3. Proposed Solution

- PocketSmart AI is a GenAI-powered recommendation system that provides personalized and budget-based suggestions using Gemini 1.5 Flash Pro.

4. Main Ideas

- ★ Home Interior Planning
- ★ Party Budget Planning
- ★ Jewelry Recommendations
- ★ Budget-based suggestions
- ★ Personalized recommendations

5. Home Interior Scenario

- The user enters budget, room type and required items. The system generates suitable and cost-effective recommendations.

6. Party Planning Scenario

- The user enters total budget, guest count, event type and venue. The system provides suggestions for catering, decoration and entertainment.

7. Jewelry Scenario

- The user enters budget, occasion and style preferences. An optional outfit image can be used for color coordination and aesthetics.

8. Expected Outcome

- A smart AI assistant that helps users make budget-based planning and shopping decisions.
