

## **PHASE 6 – PROJECT TESTING**

### **1. Testing Objective**

- The objective is to verify that the application accepts user inputs and generates suitable recommendations.

### **2. Test Cases**

- Test Case 1 – Application Launch
- Check whether the application opens successfully.
- Test Case 2 – Home Interior Input
- Enter budget and home requirements and check the generated recommendation.
- Test Case 3 – Party Planning Input
- Enter party budget and event details and check the recommendation.
- Test Case 4 – Jewelry Input
- Enter jewelry budget, occasion, and style and check the recommendation.
- Test Case 5 – User Authentication
- Check login and registration functionality.

### **3. Testing Areas**

- Input validation
- AI response
- Budget-based recommendations
- Recommendation relevance
- User interface
- Application flow

### **4. Result**

- The available Home Interior flow was tested and the application generated a recommendation output.

## Home Interior Recommendations

**Budget:** 5000.0 | **Functionality:** Modern Interior

---

1. Modern minimalist layout with smart space-saving furniture.
2. Warm ambient lighting to enhance room aesthetics.
